PROFESSIONAL SUMMARY

Civil Engineer and practicing Site Engineer at Nexa Futurity LLP, with hands-on experience in RCC construction, site execution, quantity estimation, quality control, and construction documentation. Experienced in reinforcement and shuttering inspections, concrete quantity calculations, BOQ-related work, Daily Progress Reports (DPR), cube testing records, material tracking, and coordination with contractors. Proficient in AutoCAD and Microsoft Excel, with working knowledge of STAAD.Pro, Revit, GIS, and Google Earth Engine. Published researcher in remote sensing-based flood assessment, combining practical construction knowledge with analytical and technical documentation skills. Committed to safe construction practices, accurate estimation, quality execution, and continuous professional development.

PROFESSIONAL EXPERIENCE

Site Engineer
(Feb 2026 – Present)

Nexa Futurity LLP — Nexa Prime Project

- Supervise day-to-day RCC construction activities and coordinate site execution for a G+7 residential and commercial building project.
- Prepare quantity estimates and material requirement calculations for concrete, reinforcement steel, masonry, and other construction activities.
- Inspect reinforcement, shuttering, and pre-pour conditions against structural drawings and project requirements.
- Maintain Daily Progress Reports (DPR), concrete quantity sheets, cube testing records, site photographs, attendance, and material documentation.
- Coordinate with supervisors, contractors, labour teams, and project stakeholders to support planned construction activities.
- Interpret structural, architectural, and MEP drawings for on-site execution and quantity-related work.
- Support inventory and material control activities, including receipt records, usage tracking, and project documentation.

Civil Engineering Intern
(June 2023 – August 2023)

CKC Hub — G+10 Commercial & Residential Building, Mahad

- Monitored and verified the quality of incoming construction materials (concrete, steel, aggregates) against project specifications and IS Codes.
- Assisted Site Engineer with daily site layout, setting out procedures, and ensuring accurate execution of construction lines on the ground.
- Interpreted and cross-checked complex reinforcement drawings (BBS) to supervise the correct placing and tying of rebar in beams and slabs.
- Managed and filed site documentation, including daily progress reports and quality checklists, enhancing practical understanding of site administration.

Site Engineering Intern
(June 2024 – August 2024)

Government School Project, Mahad

- Assisted with initial site layout and setting-out procedures for the building footprint.
- Gained practical exposure to RCC slab and beam execution and standard site construction practices.
- Supported site supervision and coordination of day-to-day construction activities.

EDUCATION

2023-2026

Bachelor of Technology (B.Tech) in Civil Engineering
Dr. Babasaheb Ambedkar Technological University (DBATU), Lonere

- Specializing in Structural Design, Quantity Surveying, and Construction Management
- Published a research paper on “Flood Management and Mitigation Techniques” during academic tenure
- Completed academic projects focused on material estimation, cost analysis, and technical drawing preparation
- Actively developing proficiency in AutoCAD, STAAD Pro, and MS Excel

2019-2022
(First Class Distinction)

Diploma in Civil Engineering
Maharashtra State Board of Technical Education (MS BTE)

- Gained foundational knowledge of building materials, surveying, RCC design, and project planning
- Worked on practical assignments related to construction estimation and site supervision

RESEARCH PAPERS

- Flood Detection using Google Earth Engine: A Comparison of Optical and SAR-based Remote Sensing Methods, Dhotre et al – International Journal of Innovative Research and Advanced Engineering (IJIRAE) (Vol. 12, Issue 9, October 2025) DOI: https://doi.org/10.26562/ijirae.2025.v1209.01

- Multi-Temporal Flood Assessment of Mahad, Maharashtra Hybrid Method Using Sentinel-1 SAR and NDWI on Google Earth Engine, Jadhav et al – Advanced flood mapping research integrating optical and radar data for disaster risk reduction

TECHNICAL SKILLS

CONSTRUCTION & QS
- Site Engineering
- Quantity Surveying
- RCC Construction
- BOQ & Estimation
- Quality Control
- Reinforcement Inspection
- Shuttering Inspection
- Drawing Interpretation
- Material Testing
- DPR & Site Documentation

SOFTWARE & TOOLS
- AutoCAD
- STAAD.Pro
- Revit
- Microsoft Excel
- MS Word / PowerPoint
- Google Earth Engine
- GIS & Remote Sensing
- Python (Basic)

TECHNICAL / PROFESSIONAL
- Construction Management
- Project Planning
- Contractor Coordination
- Concrete Technology
- Technical Research
- Technical Writing
- Analytical Problem Solving
- Team Collaboration

ADDITIONAL INFORMATION

- **Languages:** English • Hindi • Marathi
- **Career Focus:** Site Engineering • Quantity Surveying • Estimation & Billing • Project Management
